

MT5’da endi yuqoriroq kredit yelkasi darajalari mavjud

Kuchga kirish sanasi 2026-yil 1-oktabr	Maksimal kredit yelkasi 1:2000 gacha
---	---

Oshirilgan kredit yelkasi

Tanlangan moliyaviy instrumentlar guruhlarida bo'yicha maksimal kredit yelkasi darajalari oshirildi, bu standart savdo sharoitlarida yanada ko'proq moslashuvchanlikni ta'minlaydi.

Instrument guruhi	Avvalgi	Yangi
Spot oltin	1:500	1:2000
Asosiy valyuta juftliklari	1:1000	1:2000
Energetika	1:100	1:500
Kross-valyuta juftliklari	1:500	1:1000
Ekzotik valyuta juftliklari	1:200	1:500
Spot metallar	1:500	1:1000
INDEX_2	1:200	1:300
Asosiy kriptoaktivlar	1:200	1:500
Boshqa kriptoaktivlar	1:75	1:100

Yangi tuzilma qanday ishlaydi

Yangi kredit yelkasi modeli ekspozitsiyaga asoslanadi. Sizga tatbiq etiladigan kredit yelkasi pozitsiyalaringizning jami nominal ekspozitsiyasiga bog'liq. Ekspozitsiya yuqoriroq darajalarga o'tgani sari tatbiq etiladigan kredit yelkasi bosqichma-bosqich kamayadi.

	Bosqich	Tavsif
01	Oddiy savdo davri	Ayrim instrumentlar guruhlarida uchun yangilangan maksimal kredit yelkasi limitlarini o'z ichiga olgan standart kredit yelkasi darajalari qo'llaniladi.
02	HMR davri	Muhim makroiqtisodiy e'lonlar, yaqinlashayotgan savdo amalga oshirilmaydigan davrlar (masalan, bozor yopilishi, dam olish kunlari), davlat bayramlari va boshqa belgilangan yuqori xavfli davrlar kabi bozor xavfi yoki o'zgaruvchanligi yuqori bo'lgan paytlarda yuqori marja talablari (HMR) qo'llanilishi mumkin.
03	HMR davrida	HMR davrida ochilgan yangi bitimlarga yuqori marja talablari qo'llaniladi. HMR boshlanganda mavjud ochiq pozitsiyalar qayta hisoblanmaydi.
04	HMR tugaganda	HMR davrida ochilgan pozitsiyalar qayta hisoblanadi va HMR davridan keyin amal qiladigan standart kredit yelkasi qo'llaniladi.

Bu savdolaringiz uchun nimani anglatadi

Yuqoriroq maksimal kredit yelkasi	Ekspozitsiyaga asoslangan nazorat	Xavfga sezgir HMR
Tanlangan instrumentlar standart savdo sharoitlarida yuqoriroq maksimal kredit yelkasini taklif etadi. Yuqoriroq kredit yelkasi bilan savdo qilish kapitalga bo'lgan xavfni oshiradi.	Kredit yelkasi bitta darajada doimiy qolish o'rniga jami nominal ekspozitsiyaga qarab o'zgaradi.	Mumkin bo'lgan bozor volatilligini boshqarish uchun oldindan belgilangan yuqori xavfli davrlarda oshirilgan marja talablari qo'llanilishi mumkin.

Energetika

Instrumentlar: BRN, BRNCash, CL, HO, NG, NGASCash, USOILCash, WT
